

## Solar RFP Questions & Answers

1. The RFP states that the bid cannot exceed \$300,000, is this a hard number or is there the ability to provide bids over this, as the market indicates that the project will not be able to be complete within this budget.

Response: While Ocean Discovery Institute would like to keep costs as low as possible, we understand that the circumstances around this design might make it impossible to complete the project within the budget. Please provide a fair and honest quote that will ensure the job is able to be complete in the time frame needed.

2. Is the solar tree the only technology Ocean Discovery is interested in?

Response: Yes, the parking lot has already been designed for two stand-alone solar structures and we intend to stay with that design.
